CORE TECHNICAL MATRIX

AI & Data
AI Integration Pipelines, MongoDB, DynamoDB, SQL, MySQL

Engineering
JavaScript, Node.js, Angular.js, React Native, Java (Certified), HTML, CSS

Strategy
Product Design Thinking, Value Stream Identification, Example Mapping

Architecture
AWS Cloud Deployment, CI/CD Pipeline Design, Microservices, Security Layers

Quality
TDD, BDD, Gherkin, Cucumber

EDUCATION AND CERTS

- MEd, Harvard University
- BA, Boston College (Cum Laude)
- Java Certified Developer
- SAFe SPC 6

PROFESSIONAL SUMMARY

Strategic Engineer and Technical Architect with over 30 years of experience. I bridge the gap between complex business requirements and production-ready code, specializing in Node.js, AWS, and modern CI/CD pipelines. My guiding principle is to find the simplest solution - reducing process and code complexity to increase speed of delivery and quality.

HIGH-IMPACT TECHNICAL DEPLOYMENTS

Forward Deployed Engineer | WorldFish (Penang, Malaysia)
- Led high-stakes product workshops for international research organizations to clarify technical outcomes and establish production-ready roadmaps

Technical Architect & Lead | IBM
- Architected the security layer for 15 web applications and led global engineering teams toward continuous integration and automated delivery.
- Maintained cloud-based applications on AWS and WebSphere using Java and Node.js.

Strategic Transformation Engineer | Haldex / SAF-Holland
- Optimized team flow through Value Stream Identification and integrated technical development with strict industry standards.

Technical Agile Consultant | ICON Agility Services
- Embedded with American Express and Inspira Financial to "productize" IT services and enhance technical ownership.
- Guided a 700-person IT division at Fidelity Investments toward modern engineering practices.

RECOMMENDATIONS

"Through all my interactions, Tom has consistently contributed to driving success. He is a pleasure to work with, and his insights into practical ways to help teams align and achieve their goals are second to none."
—*Jean-François Chénier, Chief Product Officer at AgUnity, non-profit*

"What I admired most about Tom was his ability to think big picture and out of the box. He was strategic and could brainstorm ideas with the best of them. His many years of experience as a developer, in IT, and as an Agile expert was invaluable to the organization. And his ability to share and clearly communicate this knowledge with others was remarkable."
—*Maria Tacadena, Agile Transformation Director, fintech*

"Tom's engaging, deeply knowledgeable, and humorous approach to Agile, code creation, and quality fostered a flow of information and learning that teams easily incorporated into their workflows and behaviors."
—*Greg Manto, Technical Agile Coach, insurance industry*
